

**2020 Conflict Minerals Report  
Avaya Holdings Corp.**

**Reporting period: January 1, 2020 to December 31, 2020**

Avaya Holdings Corp. (“Avaya” or the “Company”) prepared this Conflict Minerals Report (the “Report”) for the reporting period from January 1 to December 31, 2020. The Report provides the information required by the provisions of Rule 13(p) under the Securities Exchange Act of 1934 and the instructions to Form SD which require companies registered with the Securities and Exchange Commission (the “SEC”) to annually disclose the use of conflict minerals originating from the Democratic Republic of the Congo (the “DRC”) or adjoining countries (“covered countries”) and not from recycled or scrap sources that are necessary to the functionality or production of a manufactured product. Conflict minerals are identified as columbite-tantalite (coltan), cassiterite, gold, wolframite or their derivatives, or simply tantalum, tin, tungsten and gold (collectively, “Conflict Minerals” or “3TG”). Use of the terms “Avaya” or the “Company” in this Report refers to Avaya Holdings Corp., a Delaware corporation, and its consolidated subsidiaries taken as a whole, unless the context otherwise indicates. The Report is publicly available on the Company’s website at: <https://www.avaya.com/en/about-avaya/corporate-responsibility/>.

The Company has conducted a reasonable country of origin inquiry (“RCOI”) and subsequent due diligence according to the 5-step approach detailed in the Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas Third Edition (“OECD Guidance”), an internationally recognized due diligence framework, to determine if it knows or has reason to believe that the 3TGs identified in the Company’s products originated from sources in the covered countries. As a downstream user of minerals, the Company contracts the manufacture of products with electronic manufacturing suppliers (“EMS”). Given the size of the Company’s supply chain and the fact that the Company does not have direct relationships with the mines and/or the smelters and refiners (the “SOR”) providing the minerals, it is challenging to identify all of the relevant source mines. As such, the Company relies on industry initiatives (principally, the Responsible Minerals Initiative or “RMI”), manufacturing partners and parts suppliers with whom the Company has direct relationships to determine the source of the 3TGs in the Company’s products. The Company utilizes RCOI data provided by the RMI and relies on audits performed by the RMI to assess the SORs’ conformance to the Responsible Minerals Assurance Process (“RMAP”).

**Executive Summary of the 2020 Conflict Minerals Program**

The Company performed an RCOI on those suppliers that provided the Company with products and parts containing 3TGs which were then sold during the relevant reporting period. Ninety-nine percent (99%) of the suppliers responded. The following table defines terminology used in this Report, consistent with the RMI Smelter Database.

Term	Definition	Statistic
Eligible	RMI recognized smelter eligible for RMAP	323
Conformant	Smelter who passed RMI RMAP audit	242
Active	Eligible smelter who is not yet conformant but is working with the RMI to become conformant	51
Not Active	Un-cooperative and not actively working with the RMI. Also includes businesses who are not operational - either temporarily or permanently.	30

The results from the Conflict Minerals Reporting Templates (“CMRT”) returned by the suppliers showed 323 reported, eligible SORs involved in the Company’s supply chain. Of the 323 SORs, all could be found on the Smelter Lookup Tab of the CMRT. These 323 SORs (listed in Appendix A) are either “conformant” (242), “active” (51) or “not active” (30). The RMI Smelter Database is a list of possible smelters being tracked by the RMI of the Responsible Business Alliance (“RBA”) and it identifies the status of each of the smelters. RMI uses an independent third-party audit of SOR management systems and sourcing practices to validate smelters’ management processes for alignment to the OECD Guidance and RMAP procedures.

The Company cannot be certain about the origin of the Conflict Minerals used by smelters or entities that are not listed as RMAP-conformant SORs, since their management processes have not been audited per the RMI RMAP. The Company has and will continue to work with suppliers to obtain more information regarding the status of these smelters and entities.

### Company Overview

Avaya is a global leader in digital communications products, solutions, and services for businesses of all sizes, delivering most of its technology through software and services. The Company enables organizations around the globe to succeed by creating intelligent communications experiences for clients, their employees and their customers. The Company builds open, converged and innovative solutions to enhance and simplify communications and collaboration in the cloud, on-premises or a hybrid of both. The Company’s global, experienced team of professionals delivers award-winning services from initial planning and design, to seamless implementation and integration, to ongoing managed operations, optimization, training and support.

The Company business has two operating segments: **Products & Solutions** and **Services**.

- **Products & Solutions** primarily develops, markets, and sells unified communications and contact center solutions, offered on premises, in the cloud, or as a hybrid solution. These integrate multiple forms of communications, including telephony, e-mail, instant messaging and video.
- **Services** develops, markets and sells comprehensive end-to-end global service offerings that enable customers to evaluate, plan, design, implement, monitor, manage and optimize complex enterprise communications networks.

The Company sells directly through its worldwide sales force and indirectly through its global network of channel partners, including distributors, service providers, dealers, value-added sellers, system integrators and business partners that provide sales and services support.

The Company outsources the design of some, and the manufacture of substantially all, of its products and solutions.

### **The Company's Conflict Minerals Program Overview**

Avaya is committed to ethical business conduct and responsible sourcing and the Company works with its global supply chain partners to ensure compliance with Section 1502 of the Dodd–Frank Wall Street Reform and Consumer Protection Act. The international supply chain for these minerals is complex, however, and tracing them is challenging. Many of the raw materials Avaya uses that contain conflict minerals pass through a variety of intermediaries before reaching the Company. Avaya does not purchase directly from the smelters that produce the minerals. Therefore, Avaya must rely upon its suppliers to identify the sources of conflict minerals and to declare the conflict-mineral status of their products, as stated in Avaya's conflict minerals policy. The Company also uses supplier information from knowledgeable sources within the Company and online to decide on conflict minerals risk and necessary remedial action.

The Company is an affiliate member of the RBA, participates in RBA's RMI committees, including the Plenary, the Due Diligence Practices Team and the Mineral Reporting Template Team, and relies heavily on the results of RMI smelter or refiner audits, which includes cross-recognized audit programs of the London Bullion Market Association ("LBMA") and Responsible Jewelry Council ("RJC"). The Company also relies on guidance published by the RMI as it relates to downstream companies and incorporates the RMI CMRT, as well as the requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank"), the OECD Guidance and related supplements for 3TG. The three key elements of the Company's Conflict Minerals Program (the "Program") are:

- I. Determination of Product Applicability
- II. The Reasonable Country of Origin Inquiry ("RCOI")
- III. Due Diligence

#### **I. Determination of Product Applicability**

The Company generates a list of products and parts that (1) were contracted to be manufactured for the Company, (2) were sold by the Company in the reporting year, and (3) include 3TG. Products purchased off the shelf from Original Equipment Manufacturers ("OEMs"), and re-sold or passed through without modification, are excluded as the Company is not the manufacturer of those products. This list of in-scope products and parts is further reviewed by comparing it against the Company's previous year's RCOI results. This list is then provided to a third-party partner to conduct the Company's RCOI. The third-party partner works under close supervision of the Company's Conflict Minerals Program Manager.

The Company outsources the design of some, and the manufacture of all, of its products and solutions. Therefore, the RCOI included the Company's EMS providers, Original Design Manufacturers and the Company controlled suppliers (the "suppliers") of parts and components used in the Company designed hardware products and parts that were sold to customers during the calendar year. Finished products and

parts obtained from OEMs where the designs are not influenced by the Company (i.e., products or parts which were purchased and included in the Company's solutions without modification or additional assembly) are excluded from the scope of the RCOI. The Company's products and parts that contain 3TGs not from recycled or scrap sources, which are in scope pursuant to Dodd-Frank requirements, consist of gateways, routers, servers, network infrastructure equipment and endpoints.

## II. Reasonable Country of Origin Inquiry

The Company sends all in-scope suppliers a CMRT, along with educational and training materials to facilitate their completion of the CMRT. The Company also uses the RMI RCOI Database to determine country of origin. Suppliers who do not respond to the request to complete the CMRT are escalated to the applicable Company Commodity Manager, who reminds them of their contractual obligation to provide this information. The Company leverages information resources of the RMI, publicly available information published by the LBMA and the RJC, as well as the resources of a third-party consultant to analyze the supplier responses. The results of the information review are used to identify those suppliers for which additional information and due diligence is required. The completed CMRTs and results of any assessments are stored electronically.

## III. The Company's Due Diligence Program (the "DD Program")

The Company's DD Program was designed in accordance with the OECD five step framework, the international framework currently recognized for compliance with the Dodd-Frank conflict mineral requirements.

### Step 1: The Company's Management System

Consistent with its environmental, health and safety (EHS) management system, the Company has implemented a 'Plan-Do-Check-Act' mechanism for its Conflict Minerals processes. Specifically,

- The Company developed a Conflict Minerals Policy (the "Policy") and communicates it to suppliers during the RCOI process and during annual supplier engagement forums. This Policy sets the expectation that direct material suppliers will "...source minerals [sic 3TG] from non-conflict regions or, if sourced from conflict regions, ... identify whether the sourcing is conflict free (i.e. not used to fund conflicts in [c]overed [c]ountries) through a reasonable due diligence program." The policy and the requirement to provide a CMRT is included in new Requests for Quotations and supplier contracts. This policy is posted on the Company website at: <https://www.avaya.com/en/about-avaya/corporate-responsibility/> and is updated from time to time as needed.
- The Company developed Standard Operating Procedures that, with the Conflict Minerals Policy, define the Company's process for conducting the DD Program. Responsibilities rest with a cross-functional team of subject matter experts from Supply Chain Management, Product Compliance, Product Engineering, Research and Development, and the Environmental and Legal functions of the Company. Legal and EHS leads the team and provides periodic updates to senior management.
- The Company is an affiliate member of the RBA and participates in RMI to leverage best practices from other member companies, and identify and implement DD Program improvements, including greater supply chain and customer transparency.

- Controls are in place to manage and retain from year to year the documentation associated with each RCOI and related due diligence activities.
- The Company partners with suppliers to identify the sources of Conflict Minerals in the products and parts that they provide to the Company, as indicated in the RCOI results. Suppliers are engaged through periodic business reviews and an annual supplier forum to discuss compliance requirements. If significant risks, such as non-conformant smelters, are identified through the DD Program or other means, the Company retains the right to suspend trade with, or disengage from, a supplier.
- The Company developed Conflict Minerals Supplier Training to instruct suppliers on how to perform their own due diligence and how to fill out the CMRT form.
- To resolve grievances that suppliers or SORs may have, the Company uses the publicly available RMI Grievance Mechanism. Suppliers are informed of this Grievance Mechanism in the Company's Conflict Minerals Supplier Training. The Grievance Mechanism may be used for complaints against the Company, the RMI, the RMI RMAP or auditors used by the RMI, or for other grievances related to Conflict Minerals. The grievances, including corrective actions, are tracked and monitored by the RMI. The following is a link to the Grievance Mechanism: [Grievance Mechanism \(responsiblemineralsinitiative.org\)](https://responsiblemineralsinitiative.org)

#### Step 2: Identify and Assess Risks in the Supply Chain

The Company uses the RCOI analysis results to identify suppliers using SORs that are not engaged in an approved validation scheme (e.g., RMAP, LBMA and the RJC) and to assess related supply chain risks. The Company evaluates the RCOI information collected using the CMRT, including performing a quality review of the results. If discrepancies, errors, or omissions are identified, the response for that supplier is deemed unacceptable and is returned to the supplier for correction. Approximately 79% of the CMRTs collected for 2020 were acceptable as received or successfully corrected by the supplier and accepted by the Company. Appropriate risk was assigned to the 21% of suppliers who did not make the corrections requested by the Company. The Company reviewed and compared the responses with other information in the Company's possession (in-house experts, etc.) and, where appropriate, made further inquiries of the relevant suppliers.

The Company follows a defined escalation process for suppliers that do not respond to the request for CMRT data. All in-scope suppliers receive an initial CMRT request email. Those that do not timely respond receive a first reminder, second reminder, final reminder and escalation emails as necessary. Internal Company buyers are identified for each supplier. Any supplier not responding to the emails is flagged to the Company buyer for further action. The Conflict Minerals Program Team meets regularly to review data collection efforts, engaging Internal Company buyers as necessary to determine next steps, including, where appropriate, providing negative feedback to suppliers and recommending potential contract termination.

Based on a review of the data collected, those suppliers / SORs deemed to pose a risk to the Company's supply chain were addressed in Step 3 below.

Step 3: Design and Implement a Strategy to Respond to Identified Risks

To address the risks in the Company's supply chain posed by the use of RMAP non-conformant SORs, the Company remains actively involved in the RBA and RMI, including participation in RMI committees such as the Plenary Team, Due Diligence Processes Team and Minerals Reporting Template Team. Participation in these RMI efforts gives the Company access to the RMI smelter auditing efforts, thereby providing Avaya with information to assess supply chain risk from conflict minerals. The Company works with supply chain partners to address reported non-conformant smelters, including dis-engagement or suspension if necessary, although the Company did not find it necessary to exercise dis-engagement or suspension in 2020. The Company also works with supply chain partners to resolve smelters' resistance or refusal to participate in either the RMAP list program or other approved schemes.

Step 4: Independent third-party audit of our SORs' due diligence practices

As a downstream user of 3TG minerals and a member of the RMI, the Company leverages information from the independent third-party audits of the SORs facilitated by initiatives such as the RMI's RMAP, LBMA and the RJC to evaluate the SORs' practices. Over time, this effort has resulted in increasing the number of SORs in the Company's supply chain that are RMAP-conformant. The Company actively participates in RMI activities, including involvement in sub-committees and contributing possible SOR names, to support the Company's efforts to assess each SOR's alignment to the OECD Guidance via the RMAP.

Step 5: Annual Reporting on our Supply Chain Due Diligence

The Company prepares an annual report documenting its Supply Chain Due Diligence Practice activities in accordance with the Dodd-Frank requirements. Participation in the RMI CMR Peer Review resulted in valuable feedback which was incorporated as appropriate in the Company's final Conflict Mineral Report.

**Reporting Period Due Diligence Results****Efforts to Determine Conflict Minerals Country of Origin and Facilities used to Process Conflict Minerals**

The Company's RCOI process and due diligence to determine the source of 3TGs in the Company's products is based on data collection and partnership with suppliers. The Company queried 152 suppliers for the 2020 RCOI reporting period, of which 150 responded. The 2 that did not respond were escalated to the Company's Procurement team and their lack of response was considered in assessing their supply chain risk. Although business with these 2 companies was not terminated, they were given negative feedback through their supplier scorecard. For those that did respond, 323 unique SORs were identified as processing 3TGs used in the parts and/or components contained in the Company's products. The Company has verified that 242 of the SORs are RMAP-conformant SORs. Fifty-two (52) SORs are making progress toward conformance, which is an improvement over 2019, when only 5 SORs were making progress. Twenty-nine (29) SORs are in the Not Active status, which is an improvement from 2019 when there were 50 SORs in the Not Active status.

Avaya requested company level CMRTs from its suppliers and most of responses received were provided at the company level rather than specific to the product sold to the Company. Four percent (4%) of

suppliers have documented on their CMRT that they are unable to obtain a high response rate from their supply chain, making it impossible to determine the complete list of smelters in the Company's supply chain. Although the Company pressed these suppliers to obtain more complete SOR lists, the effort was ultimately unsuccessful. In addition, several SORs identified by the suppliers were not listed on the RMI, LBMA or RJC conformant SORs' lists. Nor could they be confirmed through the Company's due diligence as actual SORs. As a result, the Company cannot determine its conflict-free status (as defined by Dodd-Frank) at either a product or company level because it cannot confirm that the SORs identified provide a complete picture of Conflict Minerals sourcing. Of the information that was verified, the chart below lists the country of origin for the 3TG minerals in the Company's products.

### Country of Origin Results for 3TG in the Company's Products

Conflict Mineral	Country of Origin	Notes
Gold	Argentina, Austria, Belgium, Benin, Bolivia (Plurinational State of), Brazil, Canada, Chile, China, Czech Republic, Colombia, Denmark, Ecuador, Eritrea, Estonia, Finland, France, Germany, Ghana, Guinea, Guyana, Hong Kong, Hungary, India, Indonesia, Ireland, Italy, Japan, Jordan, Lithuania, Luxembourg, Mali, Malta, Mauritania, Mexico, Monaco, Netherlands, Nicaragua, Niger, Norway, Panama, Peru, Philippines, Poland, Romania, Russian Federation, Rwanda, Saudi Arabia, Singapore, Slovakia, South Africa, South Korea, Swaziland, Sweden, Switzerland, Taiwan, Tanzania, Thailand, Togo, Turkey, Uganda, United Arab Emirates, United Kingdom	
Tantalum	Australia, Austria, Belarus, Bolivia, Brazil, Burundi, China, Colombia, Democratic Republic of Congo, Ethiopia, France, Germany, Guinea, India, Indonesia, Ireland, Israel, Japan, Madagascar, Malaysia, Mozambique, Namibia, Nigeria, Russian Federation, Rwanda, Sierra Leone, Somaliland, Spain, Switzerland, Thailand, United States of America, Zimbabwe	The reported tantalum from the DRC and other covered countries came from 12 Smelters all of which have been audited and validated as "conformant" by the Responsible Mineral Initiative ("RMI"), which is internationally recognized for managing an independent third-party assessment program in line with the OECD Guidance.*
Tin	Angola, Australia, Austria, Belarus, Belgium, Benin, Bolivia (Plurinational State of), Brazil, Burundi, Canada, Chile, China, Colombia, Croatia, Czech Republic, Denmark, Democratic Republic of Congo, Egypt, El Salvador, Estonia, France, Gabon, Germany, Guinea, Hong Kong, Hungary, India, Indonesia, Israel, Italy, Japan, Kazakhstan,	The reported tin from the DRC and other covered countries came from 3 smelters all of which have been audited and validated as "compliant" by the RMI, which is internationally recognized for managing an independent third-party assessment program in line with the OECD Guidance.*

Conflict Mineral	Country of Origin	Notes
	Laos, Lebanon, Malaysia, Mexico, Mongolia, Morocco, Myanmar, Netherlands, New Zealand, Nigeria, Pakistan, Peru, Philippines, Portugal, Qatar, Russian Federation, Rwanda, Saudi Arabia, Senegal, Singapore, Slovakia, Slovenia, South Africa, South Korea, Spain, Sudan, Switzerland, Taiwan, Tanzania, Thailand, Togo, Tunisia, Turkey, Uganda, Ukraine, United Arab Emirates, United Kingdom, United States of America, Venezuela, Vietnam, Yemen	
Tungsten	Austria, Australia, Belgium, Bolivia, Brazil, Burundi, Canada, China, Colombia, Czech Republic, Democratic Republic of Congo, France, Germany, Guinea, Hong Kong, Indonesia, Japan, Laos, Latvia, Malaysia, Mongolia, Myanmar, Nigeria, Peru, Portugal, Russian Federation, Rwanda, Spain, Taiwan, Thailand, Uganda, United Arab Emirates, United Kingdom, United States of America, Uzbekistan, Vietnam	The reported tungsten from the DRC came from 2 Smelters all of which have been audited and validated as "conformant" by the RMI, which is internationally recognized for managing an independent third-party assessment program in line with the OECD Guidance. *

**\*Note:** SORs who receive minerals from the DRC and adjoining countries, i.e. covered countries, can still be declared conformant to the RMAP process.

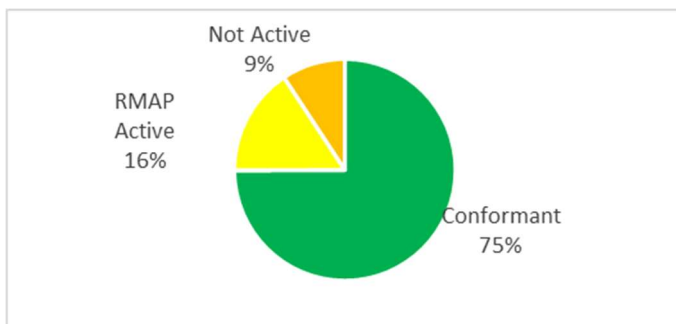

The 323 SORs identified by the Company's in-scope suppliers, the minerals processed, and their classification regarding the RMAP list, the LBMA and the RJC, are provided in the table included as Appendix A to this Report. A graphical depiction of the 2020 RCOI and due diligence results is provided in Figure 1 as compared to the 2019 results in Figure 2. The validation classifications of the SORs reported in the graphs (Figures 1 and 2) are defined as follows:

- Conformant - These are RMAP-conformant SORs, having passed the RMI RMAP audit.
- RMAP Active - These are smelters that have committed to undergoing a RMAP audit or preparing for an audit.
- Not Active - These are smelters that are neither Conformant nor RMAP Active.

**Figure 1- 2020 Results**

Mineral	Gold	Tantalum	Tin	Tungsten	Total
Conformant	107	38	55	42	242
RMAP Active	29	0	16	6	51
Not Active	4	0	22	4	30
<b>Total</b>	<b>140</b>	<b>38</b>	<b>93</b>	<b>52</b>	<b>323</b>

**Figure 2 – 2019 Results**

Mineral	Gold	Tantalum	Tin	Tungsten	Total
Conformant	105	39	77	43	264
RMAP Active	1	1	1	2	5
Not Active	37	0	10	3	50
<b>Total</b>	<b>143</b>	<b>40</b>	<b>88</b>	<b>48</b>	<b>319</b>

**Future Plans to Mitigate Conflict Minerals Sourcing Risk**

To help mitigate the risk of potentially sourcing Conflict Minerals from suppliers who do not have OECD aligned due diligence measures in place, Avaya will:

- Perform the RCOI process by December of the calendar year to allow additional time for supplier engagement and due diligence.

- Continue to require completion of the CMRT in applicable Requests for Quote (“RFQ”) and from applicable new suppliers upon award of contract (if not provided as part of an RFQ).
- Identify suppliers that may, based on past performance, need additional due diligence in the future.

In addition, for those SORs that cannot be verified as SORs using the RMI SOR Database, Avaya will:

- Ask suppliers to find out who the true SOR is or provide proof that the listed SOR is a SOR.
- Send a list of the un-recognized SORs to the RMI for evaluation and possible action.

In addition, for those SORs who are in the RMI SOR Database but who refuse to cooperate with the RMI RMAP, Avaya will:

- Ask the supplier to contact the SOR and encourage the SOR to pursue RMAP conformance auditing.

### **Forward-Looking Statements**

This document contains certain “forward-looking statements.” All statements other than statements of historical fact are “forward-looking” statements for purposes of the U.S. federal and state securities laws. These statements may be identified by the use of forward looking terminology such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “our vision,” “plan,” “potential,” “preliminary,” “predict,” “should,” “will,” or “would” or the negative thereof or other variations thereof or comparable terminology. The Company has based these forward-looking statements on its current expectations, assumptions, estimates and projections. While the Company believes these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks and uncertainties, many of which are beyond its control. These factors are discussed in the Company's Annual Report on Form 10-K, subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K filed with the SEC and may cause its actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by these forward-looking statements. For a further list and description of such risks and uncertainties, please refer to the Company’s filings with the SEC that are available at [www.sec.gov](http://www.sec.gov). The Company cautions you that the list of important factors included in the Company’s SEC filings may not contain all of the material factors that are important to you. In addition, in light of these risks and uncertainties, the matters referred to in the forward-looking statements contained in this report may not in fact occur. The Company undertakes no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

## APPENDIX A

**List of Reported Smelters/Refiners Facilities Processing Minerals Used in the Company's Products as Confirmed by the Responsible Minerals Initiative (RMI) Lists**
